AED Omega creates accountability for compliance via a series of checks and balances. Accountability starts at the individual AED level and escalates through a multi-tiered structure up to the site coordination, if overall compliance becomes an issue. AED Omega's automated technology helps drive compliance from the lowest level upwards and makes people clearly accountable for maintaining compliance

As you may know, all 50 states require quarterly preventive maintenance inspections on all AED's (automated external defibrillator). S.H.O.C.K. Saves Lives provides the total heart safe solution AED data management with "AED Omega". It provides a unique solution that is comprehensive, complete, yet simple in monitoring all the elements of your AED program. AED Omega, eliminates the labor-intense workload that most AED programs run on. AED Omega can give you the flexibility in running it on an excel format, or use our automated technology where you can get the most benefit and allows you to manage your AED program by just a few simple clicks.
